**TERMS OF REFERENCE (TOR) FOR THE DEVELOPMENT OF
MARULENG LOCAL MUNICIPALITY INTEGRATED
TRANSPORT PLAN (ITP) 2024 - 2029**

1. INTRODUCTION

Maruleng Local Municipality is one of the municipalities which is bordered by the Kruger National Park and is within some of Limpopo prime tourist attractions. An existing airport i.e Hoedspruit Airforce Base, also plays a significant role in increasing tourist traffic. Maruleng Local Municipality has no dedicated staff that can assume the responsibility for the development of their ITP. Therefore, a comprehensive Integrated Transport Plan (ITP) needs to be developed so that the transport aspects are adequately and timeously addressed. This is in terms of Technical Transport Planning Guidelines for Local Integrated Transport Plans (LITPs) to be prepared by Type 3 Planning Authorities 2009. The developed five-year ITP must be updated annually and in line with the Municipality Integrated Development Plan (IDP). ITPs are components of IDPs. An IDP cannot be complete if there is no chapter that covers transport related issues.

Although the ITP is required, there is a need for an urgent parallel process to be followed to have a Public Transport Plan that would identify the network and public transport services designs in Maruleng Local Municipality. The Transport Register (TR), Operating License Strategy (OLS), Rationalization Plan (RatPlan) and Public Transport Plan (PTP) need to be completed within the first nine (9) months of the appointment of the successful bidder. In light of these developments the Limpopo

Department of Transport and Community Safety is calling for a proposal to develop an ITP for Maruleng Local Municipality and to fast track the development of the TR, OLS, RatPlan and Public Transport Plan.

2. SCOPE OF WORK

The development of the Maruleng Local Municipality Integrated Transport Plan should be guided by the prescripts of the following documents, amongst others:-

- White Paper on National Transport Policy 1996
- National Land Transport Act No 5 of 2009
- Government Gazette: Regulation No.30506 dated 30 November 2007- National Land Transport Regulations on Publications of Transport Plans.
- Managerial Transport Planning Guidelines 2009
- Technical Transport Planning Guidelines for Local Integrated Transport Plans (LITPs) to be prepared by Type 3 Planning Authorities 2009
- Pro-forma Local Integrated Transport Plan (Fictitious Local Municipalities) 2009
- Northern Province Interim Passenger Transport Act, No 4 of 1999
- Provincial Land Transport Framework 2012
- Public Transport Strategy and Action Plan 2007
- National Transport Master Plan (NATMAP) 2050

- National Freight Transport Strategy 2005
- Limpopo Freight Transport Strategy 2012
- National Small Vessels Regulation of 2007
- National Land Transport Spatial Framework (NLTSF)
- Limpopo in Motion 2003
- Limpopo Freight Databank 2011
- Integrated Public Transport Networks in the Limpopo Province 2010
- Limpopo Employment Growth and Development Strategy

- Limpopo Province Rural Transport Strategy 2011
- Limpopo Development Plan (LDP)
- Maruleng Local Municipality IDP
- Maruleng Local Municipality LED strategy
- Maruleng Local Municipality Spatial Development Framework
- Mopani District Integrated Transport Plan 2015
- Minimum Requirements for the Preparation of Integrated Transport Plans as in Government Notice No. 881 issued on the 29th July 2016

Without deviating from the legislative guidelines, requirements and prescripts of the above-mentioned documents, the development of the Integrated Transport Plan through consultation of all stakeholders and the community at large, should at least incorporate the following information:-

3. MINIMUM CONTENTS OF THE ITP

The contents of the ITP must be in line with the Technical Transport Planning Guidelines for Local Integrated Transport Plans to be prepared by Type 3 Planning Authorities, 2009. In addition, the contents must also take account of the requirements as below:

3.1. CHAPTER ONE: INTRODUCTION

As additional to chapter 1, the introductory part should indicate the demographics of Maruleng Local Municipality in relation to Mopani District Municipality as well as population per ward.

3.1.1. OBJECTIVES OF THE PLAN:

The main objective of the study is to develop Maruleng Local Municipality ITP as well as to update the Transport Registrar (TR) relative to Maruleng Local Municipality from Mopani District Municipality ITP. The TR must detail an inventory of:

- Public transport facilities being the responsibility of Maruleng Local Municipality

- Verify the supply of public transport operators against the Operating License Administration System (OLAS) database (differentiate between legal and illegal public transport operators)
- Verify the public transport routes within the Maruleng Local Municipality
- Survey passenger numbers on the afore-mentioned routes.

As far as possible the TR should be more comprehensive and be compiled according to Regulation No. 30506 dated 30 November 2007 and attached as an annexure to the ITP.

Operating License Strategy (OLS) should be developed in terms of National Land Transport Regulations no. 30506 dated 30 November 2007 and form an annexure to the ITP. The Service Provider is also expected to develop a detailed PTP incorporating the RatPlan.

Freight Transport Strategy covering the transportation of goods to/from and through Maruleng by road and rail should be developed must also be attached as an annexure to the ITP. The strategy must at least identify routes for moving goods so as to promote their seamless movement and in the case of road freight transport, to avoid conflict with other road traffic. The role of freight rail transport and how it could be improved to relieve road transportation should also be considered. The Freight Transport Strategy must also include a plan for movement of hazardous substances.

3.2. CHAPTER TWO: TRANSPORT STATUS QUO ANALYSIS

3.2.1. Municipal Road Network

The Municipal Road Network for Maruleng Local Municipality should capture the following information:

- Route number
- Length of road

- Condition of the roads.

All the information required for the municipal road network must be captured for any National and Provincial roads running through and within the area of jurisdiction of Maruleng Local Municipality.

The current and the medium-term municipal, provincial and national budget allocations for maintenance and upgrading of roads should be ascertained. Indication should also be made of the budget needed to improve the roads surface to an acceptable level of riding quality.

The Service Provider is also expected to indicate the priority routes for upgrading and maintenance.

3.2.2. Public Transport Facilities

The plan must also encompass all modes of public transport (both scheduled and unscheduled) commonly used in Maruleng Local Municipality. Taxi Operators (Associations) and Bus Companies operating in Maruleng Local Municipality, their points of departure, routes, distances and destinations should also be incorporated in the plan. The plan must also indicate the availability of ranking facilities, their sizes, standard and conditions, and state recommendations.

3.2.3. Non-motorized Transport

Indicate the infrastructure and the extent to which non-motorized transport such as bicycles and animal-drawn carts are utilized in Maruleng as well as the availability of sidewalks, cycle paths and parking lots.

3.2.4 Freight transport

Conduct a study and provide a report on freight operations in relation to truck stops, weighbridges and classification of commodities and so forth.

3.2.5. Rail transport

Conduct a study and provide a report on rail operations to improve socio economic development in the municipality.

3.2.6. Aviation

Conduct a study and provide a report on aviation to improve socio economic development in the municipality.

3.2.7. Municipal Parking Areas

The plan should depict the existing parking areas provided by the municipality in Maruleng, their location, type and conditions, and make recommendations.

3.2.8. Utilisation of Light Delivery Vehicles (LDVs)

Conduct analysis on the utilization of LDVs as a means of public transport and make specific recommendations.

3.2.9. Current contribution of the transport sector to Growth and Domestic Product (GDP)

A further analysis needs to be undertaken to illustrate the economic impact that this sector has on the local economy. Highlighting the contribution made by the formal and informal industries would be critical.

3.3. CHAPTER THREE: TRANSPORT NEEDS ASSESSMENT

Flowing out of the *Status Quo* Analysis, there should be a report preferably in a form of matrix:

- Outlining problem areas
- Outline public transport facilities requirements including upgrading, or new facilities

- Outline the non-motorized transport infrastructure requirements such as sidewalks, parking lots and cycle paths.
- Outline road network requirements e.g. resealing, upgrading to include shoulders, re-surfacing and so forth.
- Strategies to mitigate all shortcomings unveiled, and the actual need in relation to demand for improvement in the transportation industry. This assessment should be guided by the development trajectory of Maruleng.

3.1. Public Participation

Consultative meetings must be held with all relevant stakeholders and the community at large and such meetings should be preceded by a presentation on the outcomes of the status quo analysis. Venues, dates, minutes and attendance registers of such meetings should be incorporated in the plan.

3.4. CHAPTER FOUR: TRANSPORT IMPROVEMENT PROPOSALS

- This chapter should outline proposed objectives with clear strategic interventions to be undertaken by the municipality in improving the status of transportation modes, modern technology applicable and management systems to be put in place to sustain this.
- The proposals should also take into account the development of an Integrated Public Transport Network (IPTN) for Mopani District Municipality as Maruleng Local Municipality falls within the District.
- The Municipality must be able to have an indication as to how these proposed improvements will contribute towards job creation and revenue enhancement.

3.5. CHAPTER FIVE: IMPLEMENTATION BUDGET AND PROGRAMME

3.5.1 Available budget

Obtain data and information on current budget for the Maruleng Local Municipality as well as possible contributions from Mopani District Municipality, National Department of Transport, Limpopo Department of Transport and Community Safety, South African National Roads Agency Limited (SANRAL), Roads Agency Limpopo (RAL) and other conditional grants as well as other sources over the MTEF period.

3.5.2 Project implementation Budget and Programme

Indicate transport projects (such as spaces for driving schools) to be executed over the period of five years. In this exercise indicate potential costs per project, the projected period of implementation and amount budgeted for each project. Prepare a possible implementation plan to coincide with the budget allocations as far as possible. Identify possible funding sources and possible appetite for investment based on private sector funding where possible.

3.5.3 Project plan and Transport projects

A project plan should be drawn up for each project approved and budgeted for and incorporated in the transport plan.

3.5.4 Monitoring and Evaluation

- A better mechanism of monitoring the implementation of Integrated Transport Plan should be developed as part of the services to be rendered in this instance.
- Evaluation criteria should also be developed in order to guide the municipality as to the effectiveness of its strategic interventions and/or implementation.

3.4. CHAPTER 6: PUBLIC TRANSPORT PLAN AND OPERATING LICENCE STRATEGY

The process of developing the PTP will have to be fast tracked and completed within six (6) months of date of appointment. In this chapter, a brief summary of the PTP should be provided. The details should be submitted as a separate annexure to the ITP and should at least address the following:

- Development of an operational plan for public transport
- Development of a fare regime
- Recommendation of strategic and physical integration of services between modes
- Costs for the provision of the service
- Recommendations on the need for subsidy

The operating license strategy must be able to verify the supply of public transport services on public transport routes compared to the demand for such services i.e confirm whether the routes are viable/lucrative or not. The Operating license strategy must provide details in terms of numbers on specific routes where there is need for additional licenses as well as analysis of those routes where there is saturation or over supply of operating license particularly for minibus taxi services and scheduled/unscheduled bus services. The issues of passenger numbers and model used on routes or corridors must be surveyed in a way that could guide the provincial regulatory entity to award or not award an application for a new service or a new entrant in the public transport space.

4. DELIVERABLES

4.1. DATA CAPTURING, DISSEMINATION AND STORAGE
